Lightpath

SecureNet

Internet+ security all in one solution

Protect your business from the damage, financial loss, and reputational loss caused by an Internet outage due to a volumetric DDoS attack. Lightpath SecureNet combines Internet connectivity with built-in volumetric DDoS protection so your business can run uninterrupted.

- Reliable 100 Mbps - 10 Gbps Internet plus Managed DDoS protection

Managed DDoS protection

Managed DDoS Protection automatically identifies and re-routes suspect volumetric malicious data away from the network so that it can be cleansed and analyzed without disturbance to your business.

- Quick deployment
- Expert 24/7 DDoS monitoring and technical support
- Detection and automatic mitigation of volumetric attacks

- High-capacity scrubbing centers start mitigating attacks within seconds
- Reporting on verified DDoS attacks
- Core network detection and mitigation lowers Internet latency
- Customized protection from volumetric attacks

Expert Lightpath Managed Services staff implement and monitor your solution

- Reduce complexity and cost
- Eliminate capital expenditures
- Reduce need for internal staffing

Prepare and Prevent

- Always on Internet
- Mitigate volumetric DDoS cyberattacks
- Protect your reputation
- Avoid costly downtime
- Increase business survival
