

Lightpath

Dark Fiber

Your Own Fiber, Right Where You Need It

Meet your bandwidth needs with your own physically private Dark Fiber network, right where you need it, and benefit from reliability, security, and maximum control. Dark Fiber's virtually unlimited bandwidth supports massive amounts of business applications and data, all with predictable performance for all your high capacity bandwidth needs.

Reliability and Security

- Completely secure
- Leverages unique rights-of-way providing added resilience to your infrastructure
- Predictable performance

Customizable and Scalable

- Virtually limitless in its bandwidth and the services it can support
- Fixed cost doesn't vary with services you deploy on dark fiber

- Tailored to your connectivity requirements whether you need a single pair of fibers, or a more complex multi-site network

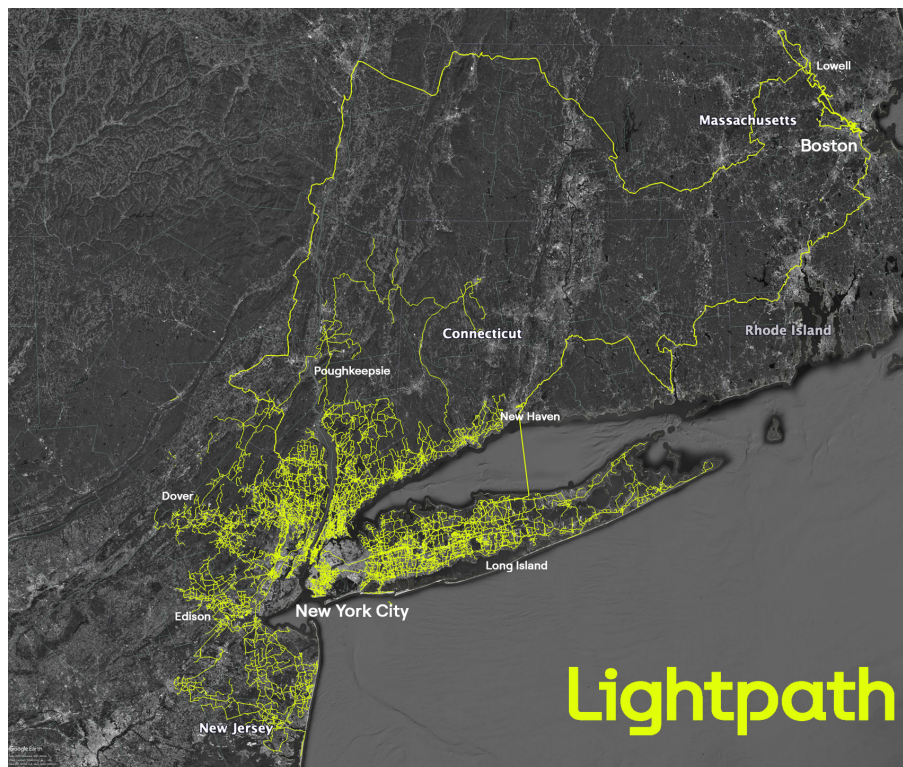

Flexibility and Control

- Total control over your own private fiber, with your optronics on the endpoints to connect to the next point
- Customers with in-house expertise can manage their own network
- Supports a large number of configurations, services, and applications

Lightpath's engineering team will work with you to customize a solution to fit your needs. Choose the routes, strands, and end point locations that best meet your goals. Lightpath fiber is available as leased or Indefeasible Right of Use (IRU). Add your own optronics at the end points to create a point-to-point circuit, or as part of a larger, more complex topology.

The Lightpath Network

Lightpath offers over 20,000 route miles of fiber serving over 13,500 service locations throughout our footprint. Lightpath continues to make significant investments to grow our fiberoptic network infrastructure to more states and in more regions to stay ahead of growing market demands for reliable wide-area data connectivity. We are well positioned to provide best-in-class Dark Fiber to meet customer's ever-increasing requirements.
