

Lightpath

Data Center Connect

Powerful Bandwidth to Critical Data Centers

Data centers are critical facilities for data, compute, Internet access, and connectivity to other locations. When powerful and reliable connectivity is essential to the success of your organization, Data Center Connect from Lightpath can provide the solutions you need. Whether you prefer Ethernet, wavelengths, dark fiber, or a private network, Lightpath can deliver the right connectivity to the data centers with which you need to connect. High availability solutions can also be designed for your most critical connections.

Flexible Connectivity

Customize the type of service and bandwidth you need for each data center, and scale as you go.

Data Center Options

Connect to 75+ data centers within the Lightpath footprint- and we're constantly adding new ones.

Secure and Resilient

Direct connectivity through our transport service provides greater protection from cyber threats.

Connect To Critical Digital Destinations

Over 20,000 route miles of fiber providing connectivity to over 13,500 service locations and 75+ data centers throughout the Lightpath footprint.

Lightpath's next-generation optical and packet networks offer unsurpassed service, flexibility, reliability, and security.

To learn how Lightpath Data Center Connect can help connect your organization connect, call 877-544-4872 or visit lightpathfiber.com/data-center-connect.
