## LP FlexNet Security

### One Solution to Protect Against Multiple Cyberattacks

Any cyberattack has a cost to your business measured not only in dollars and time but in loss of reputation too- and companies of all sizes are targets. As threats continue to evolve and grow, keeping your business safe and running takes more resources and is more important than ever before.

LP FlexNet security can help. It is a cloud-managed customizable solution that protects against multiple security threats from a single touch-point to give you greater control over your security. LP FlexNet security not only protects against today's threats, but also keeps you current on developing threats. You'll have the protection you need to keep your business safe today and into the future while being freed to focus on the growth of your business.

#### Protect Against Multiple Forms of Attack

Includes Global Threat Protection, Intrusion Prevention, Advanced Firewall, Advanced Malware Protection, Content filtering, support for VPN's

#### Extensive Visibility and Centralized Control

A centralized, cloud-managed dashboard allows you to easily monitor and report on how the internet is being used

#### Safeguard Against Future Threats

Threat definitions and filter lists are seamlessly updated, ensuring every site has optimal current protection from the latest vulnerabilities and troublesome websites

## LP FlexNet Security
