Lightpath

Financial Solutions

Reliability with the Speed You Need

Financial companies operate complex networks connecting offices, branch locations, data centers, liquidity centers, landing stations, Cloud providers, and more.

For over 30 years, Lightpath has successfully provided end-to-end connectivity solutions that are fast, reliable, and secure to connect to all your digital destinations. When network requirements get stricter, including low latency, Lightpath can custom design and deploy solutions to meet your needs with customized routing, diversity, and high availability. Lightpath 100% fiber next-generation technologies and high-performance solutions power access to essential connectivity to help financial services institutions stay competitive.

Advanced Technologies Power Transactions

Lightpath 100% fiber network provides Financial Services organizations with unsurpassed speed, reliability, and security, resulting in the best outcomes. We've been trusted by the largest organizations in the New York Metro region for over 30 years and are continually innovating with new technologies and network expansions to help our customers succeed.

With speeds up to an incredible 800 Gbps, Lightpath solutions power fast transmission and processing of large amounts of crucial data with uninterrupted connectivity, improved data management, and lowest latency.

The Lightpath network delivers the speed you need to be competitive. It is purpose-built with reliability and security to keep you connected to all your digital destinations and help meet compliance requirements related to data protection and financial transactions.

• Built-in redundancy

• No core network single points of failure

• Advanced network management

• Security throughout

Experience The Lightpath Difference

The Lightpath Difference means our expert local Sales, Engineering, and Customer Care teams are focused on your success. Using our consultative approach, we analyze your existing networks and then design and deliver the best solutions to meet your specific needs, along with superior ongoing support for the best outcomes.

- Best-in-class 100% fiber network for highly reliable, high performance, secure connectivity
- Consultative approach to assess your unique needs and provide the best solutions
- Expert engineers design custom solutions that work within your budget
- Managed implementation for maximum effectiveness and expediency
- 99.9% network availability guaranteed by our industry leading SLA
- Exceptional Customer Support: Multiple teams dedicated 24/7 with state-of-the-art Network Operations Center (NOC) monitoring for additional level of network protection
- Customer Portal with self-help tools and billing information, to get the answers you need, any time you need them

Robust, Reliable, and Secure Solutions

Lightpath connectivity solutions ensure continuous access to critical financial systems, data, and applications. Easily increase bandwidth to support growing data demands for new bandwidth-intensive services and technologies such as big data analytics, AI, and blockchain.

- Internet 20 Mbps-100 Gbps
- Ethernet 20 Mbps to 10 Gbps
- Wavelengths up to 800 Gbps
- Dark Fiber
- Cloud Connect
- Private Networks
- LP FlexNet Network Management
- LP DDoS Shield
- UC, Voice, Conferencing, hosted contact center, SIP/PRI trunks, toll free
- Custom Solutions ...and more
