Robust, Reliable, and Secure Solutions

Superior technology and 100% fiber solutions improve access to resources along with collaboration and sharing of real-time data and patient info for improved decision making and high-quality patient outcomes.

- Internet 20 Mbps-100 Gbps
- Ethernet 20 Mbps to 10 Gbps
- Wavelengths up to 800 Gbps
- Dark Fiber
- Cloud Connect
- Private Networks

- LP DDoS Shield
- SecureNet
- Managed WiFi
- UC, Voice, Conferencing, hosted contact center, SIP/PRI trunks, toll-free
- And more!

The Lightpath Next-Generation Network

Lightpath's 100% fiber-optic network is designed for reliability. POPs are diverse in common data centers and typical locations, offering more geographic diversity to ensure your communications remain up and running. We've invested millions of dollars in network upgrades, including next-generation optical and packet networks that provide unsurpassed service levels, resiliency, reliability, and security. We continue to increase the reach of our network by building into new service locations, adding networks in new areas, and pushing the boundaries of our footprint.
