Lightpath

FTTx Connect

Custom Connectivity to Your X

Wherever your X might be, Lightpath can deliver custom FTTx connectivity solutions for your organization. We build custom FTTx solutions right where you need fiber. Whether buildings and bridges or airports and private communications networks, we have the network, the know-how, and the experience to build the perfect customized solution to meet your needs.

Wireless Industry Connectivity

- Fiber to the Tower, Small Cells and 5G- Lightpath has the density and reach
- Robust infrastructure options supporting wireless backhaul to macro towers, small cells, as well as network augmentation solutions
- Vast experience working with wireless carriers, delivering solutions

Edge Computing and IoT

- Fiber infrastructure for edge and IoT applications requiring large backhaul

- Lightpath's expansive and dense network provides advanced connectivity
- Powerful connectivity to support throughput to the edge
- Easy connectivity for micro-data centers and other distributed compute facilities

Connect To Critical Digital Destinations

Next-generation optical and packet networks offer unsurpassed service, flexibility, reliability, and security. POPs are diverse from common data centers and typical locations, offering more geographic diversity.

- 15,000+ service locations
- 140+ data centers throughout the Lightpath footprint
- Connectivity to major cloud providers, financial centers, and other critical digital destinations

Beyond wireless and edge applications, Lightpath can build customized FTTx solutions for whatever your X might be.
