Lightpath

Landing Station Connect

Subsea to Land — Lightpath to You

There is a new generation of subsea building happening. With the increase of subsea cables, comes the increase of bandwidth availability and services on those cables.

Whether it's your first connection to a landing station or you need to add bandwidth, Lightpath Landing Station Connect provides custom solutions between cable landing stations and your offices, data centers, major cloud providers, or any of our service locations. We provide Ethernet, Dark Fiber, and Wavelengths up to 800 Gbps, or any combination, and can create a custom solution to meet your exact requirements.

Powerful Connectivity

- Reliable, all-fiber connectivity from end to end
- Choose the type of landing station connectivity that meets your needs

Connectivity Where You Need It

- Connect Landing Stations to offices, data centers, or anywhere you need
- Supports a large number of configurations, services, and applications

Secure and Resilient

- Direct connectivity through Lightpath transport service provides greater protection from cyber threats
- 100% fiber solutions

Connect To Critical Digital Destinations

Next-generation optical and packet networks offer unsurpassed service, flexibility, reliability, and security. POPs are diverse from common data centers and typical locations, offering more geographic diversity.
