

Lightpath

SecureNet

Internet + security all in one solution

Protect your business from the damage, financial loss, and reputational loss caused by an Internet outage due to a DDoS attack. Lightpath SecureNet combines Internet connectivity with built-in LP DDoS Shield Plus protection so your business can run uninterrupted.

- Reliable 100 Mbps - 100 Gbps Internet plus LP DDoS Shield Plus protection

LP DDoS Shield Plus protection

LP DDoS Shield Plus provides superior technology with Cyber Threat Intelligence (CTI) for a 360-degree defense against today's most advanced DDoS attacks and protections for whatever threats come next.

Suspect malicious data is identified and re-routed to be cleansed and analyzed without disturbance to your business.

- Protects across environments, including entry points

- Defends against multiple threats and zero-day vulnerabilities
- Faster detection and mitigation of new DDoS attack types
- Comprehensive customer portal for data insights and real-time reports
- Fully managed service and support by security experts

Superior DDoS protection with Lightpath as your Internet Service Provider

- Timeliest detection and mitigation without "extra hops" for least impact to latency
- One Support team for both Dedicated Internet Access and DDoS mitigation

Prepare and Prevent

- Always on Internet
- Mitigate DDoS cyberattacks
- Protect your reputation
- Avoid costly downtime
- Increase business survival
