

Lightpath

Virtual OTT SIP

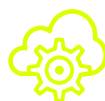

Simplify Enterprise Voice with Lightpath's Virtual OTT SIP solution.

Lightpath's Virtual SIP solution for Enterprise Voice saves time and increases flexibility by establishing a SIP trunk connection to your virtual Cloud, on-premises IP PBX, or Session Border Controller (SBC).

Simple Integration

with your On-Prem or Cloud-based Voice systems

Reliable

Lightpath reliability. Custom solutions can be offered for additional redundancy, failover needs.

Save Time

No additional hardware deployment. Agnostic to your on-prem IP PBX or virtual Cloud PBX.

Flexible

A solution for customers who need a SIP trunk connection for their preferred Cloud-based PBX from a third-party provider.

Easily Scalable

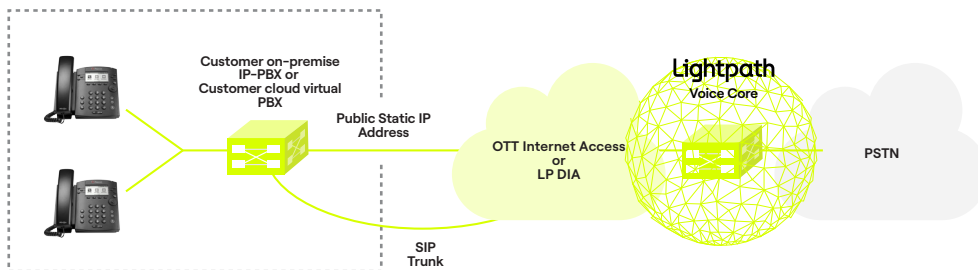

Supports multiple locations, in network and OTT. Easy scalability based on your specific needs.

Easy Deployment.

Choose Voice SIP Trunk connectivity to either:

- Your premise-based PBX with Over-the-Top (OTT) or On Network Internet connectivity
- Your Cloud-based virtual PBX

Lightpath configures a direct SIP trunk to your static public IP address on your IP PBX or SBC over internet. This simplifies the network architecture, reduces deployment time, and improves flexibility of routing capabilities of the SIP Voice service.

For more information on how you can benefit from Lightpath's Virtual OTT SIP solution, please contact 877-544-4872.

Why Lightpath

Lightpath is revolutionizing how customers connect to their digital destinations by combining our next-generation network with our next-generation customer service. Lightpath's advanced fiber-optic network offers a comprehensive portfolio of custom-engineered connectivity solutions with unparalleled performance, reliability, and security.

Our consultative customer service means we work with you to design, deliver, and support the solution for your unique needs, faster and more easily than ever before.
